

Tentative Schedule

The following is a *tentative* schedule for the course. This is subject to change, and major changes will be announced in lecture if they happen.

Week of...	Monday	Tuesday	Wednesday	Thursday	Friday
March 23	—	—	Syllabus & Introduction to R and Python	Review: Data and Visualization	Data and Visualization Lab
March 30	Review: Confidence Intervals & Hypothesis Tests	—	Simple Linear Regression	Testing Simple Linear Regression	Simple Linear Regression Lab
April 6	Multiple Linear Regression	—	Issues with Multiple Linear Regression	Testing Multiple Linear Regression	Multiple Linear Regression Lab
April 13	Categorical Predictor Variables & Nonlinear Terms	—	Comparing Nested Models	Transformations	Advanced Multiple Linear Regression Lab
April 20	Midterm Exam #1	—	Logistic Regression	Stepwise Regression	Logistic Regression Lab
April 27	Time Series & Forecasting (F:P&P)	—	Time Series & Forecasting (F:P&P)	Time Series & Forecasting (F:P&P)	Time Series & Forecasting (F:P&P)
May 4	Time Series Lab #1	—	Time Series & Forecasting (F:P&P)	Time Series & Forecasting (F:P&P)	Time Series & Forecasting (F:P&P)
May 11	Time Series Lab #2	—	Introduction to SQL	Introduction to SQL	Midterm Exam #2
May 18	Introduction to Data Mining	—	<i>K</i> -Nearest Neighbors	Cluster Analysis	Association Rules
May 25	Unsupervised Learning Lab	—	Decision Trees	<i>Reading Day</i>	<i>Reading Day</i>
