

Tentative Schedule

The following is a *tentative* schedule for the course. This is subject to change, and major changes will be announced in lecture if they happen.

Week of...	Monday	Tuesday	Wednesday	Thursday	Friday
January 5	Syllabus & Calculus I Review	—	Review: Integral Definitions, FTC & Areas (Sections 1.1–1.4)	Quiz	Integration by Substitution & Integration by Parts (Sections 1.5, 3.1)
January 12	Area Between Curves and Arc Lengths (Sections 2.1, 2.4)	—	Centers of Mass and Volumes of Revolution (Sections 2.2–2.3, 2.6)	Quiz	Surface Areas (Section 2.4)
January 19	Partial Fractions (Section 3.4)	—	Trigonometric Identities and Trigonometric Integrals (Section 3.2)	Quiz	Trig Substitution (Section 3.3)
January 26	Limits at Infinity and L'Hopital's Rule	—	Improper Integrals (Section 3.7)	Midterm Exam #1	Sequences and Their Limits (Section 5.1)
February 2	Series and Convergence Test (Sections 5.2–5.3)	—	More Convergence Tests (Sections 5.4–5.6)	Quiz	Taylor Polynomials (Section 6.3)
February 9	Properties of Power Series (Sections 6.1–6.2)	—	Taylor Series and Applications (Section 6.4)	Quiz	Separable Differential Equations (Sections 4.1, 4.3)
February 16	Linear Equations (Section 4.5)	—	Series Solutions to Differential Equations (Section 6.4)	Quiz	Parametric Equations (Section 7.1)
February 23	Calculus on Parametric Equations (Section 7.2)	—	Polar Coordinates (Section 7.3)	Quiz	Calculus on Polar Coordinates (Section 7.4)
March 2	Numerical Function Plotting and Summation of Series	—	Numerical Integration (Section 3.6)	Midterm Exam #2	Slope Fields and Euler's Method (Section 6.4)
March 9	Course Review & Extra Day	—	<i>Reading Day</i>	<i>Reading Day</i>	Finals
